Prevent vapours from building up in confined areas. Ensure that drain valves are closed at all times. Clean up and report spills immediately.

Methods and materials for containment

Major Land Spill

- └ Eliminate sources of ignition.
- └ Warn occupants of downwind areas of possible fire and explosion hazard.
- └ Prevent liquid from entering sewers, watercourses, or low-lying areas.
- └ Keep the public away from the area.
- └ Shut off the source of the spill if possible and safe to do so.
- └ Advise authorities if substance has entered a watercourse or sewer or has contaminated soil or vegetation.
 - └ Take measures to minimise the effect on the ground water.
- └ Contain the spilled liquid with sand or earth.
- └ Recover by pumping - use explosion proof pump or hand pump - or with a suitable absorbent material.
- └ Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.
- └ See "First Aid Measures" and "Stability and Reactivity"

Major Water Spill

- └ Eliminate any sources of ignition.
- └ Warn occupants and shipping in downwind areas of possible fire and explosion hazard.
- └ Notify the port or relevant authority and keep the public away from the area.
- └ Shut off the source of the spill if possible and safe to do so.
